La Secretaría de Salud (SSA) cuenta con el Sistema de Información en Salud para Población Abierta (SISPA), constituido por cuatro subsistemas, los que dan respuesta a las necesidades de información en salud. El SISPA, mediante dichos subsistemas, tiene como propósito generar e integrar información referente a: a) recursos disponibles en la SSA, b) población, c) daños a la salud y d) prestación de servicios.

Este último subsistema capta información referente a los servicios otorgados a la población demandante, datos que son obtenidos mensualmente por medio del informe que rinde cada unidad aplicativa de la SSA en las 32 entidades federativas y que es enviado en forma de concentrado por cada entidad a la Dirección General de Estadística e Informática.

La información permite conocer la cobertura e impacto del servicio, así como la evaluación de la operación; además, proporciona apoyo a tomadores de decisiones e investigadores.

Se presenta a continuación información anual captada por el SISPA referente a 1999. Una parte de la información muestra las atenciones brindadas, que está constituida por la consulta externa, hospitalización y los servicios auxiliares de diagnóstico, y la otra, contiene tabulados con las distintas poblaciones según los servicios de los que han hecho uso, como aquellas que se refieren a los menores de cinco años, la atención materna, los servicios de planificación familiar, los accidentes y las detecciones de los diferentes padecimientos.

Debido a la gran cantidad de información que capta este subsistema, la información aquí presentada se refiere a una pequeña muestra de lo que ofrece el SISPA; dicha información se encuentra disponible en la página Web de la SSA y en las publicaciones de la Dirección General de Estadística e Informática (sita en Leibnitz 20, 3er. piso, colonia Nueva Anzures, 11590 México, D.F.), como son: el Anuario Estadístico de la propia Secretaría de Salud y el Boletín Mensual del SISPA, además en las tabulaciones que se generan mensualmente por cada programa sustantivo de la SSA.
